

BONA FRESHEN UP

Sitework

Directions for use:

1. Remove loose dirt and grit from your floor. Clean floor thoroughly with Bona Parkett Cleaner. Repeat to ensure that dirt will not be trapped in the coating. Make sure the floor is completely dry before applying Freshen Up.

2. Rock container back & forth several times before opening. Apply Freshen Up with the Bona Microfiber applicator pad. Prepare the applicator pad by slightly dampening it with water. Apply Freshen Up in a 3-4 cm wide wavy line on the floor. Work on a small section at a time, about 3 m².

3. Spread Freshen Up over entire small section making sure all wood is covered. Freshen Up should be applied at 30-50 m² per litre. For best results, apply a thin consistent coat. Keep airborne dust and airflow to a minimum while floor is wet.

4. Smooth out Freshen Up, going with the grain of the wood. Continue the process until the entire floor is coated. Allow to dry a minimum of 2 hours before walking on coated floors. If needed, a second coat may be applied after this time. Always coat the entire floor to ensure an even appearance and sheen.

Note: Avoid heavy traffic and replacement of furniture and rugs for 24 hours after the final coat. Clean tools with soap and water.

Maintenance

Wetcleaning of the floor may be resumed after one week. For regular cleaning use Bona Parkett Cleaner. Do not use strongly alkaline cleaning agents as they may damage the floor.

In contrast to floors treated with polish, wax or similar material, a floor maintained with Freshen Up can still be overcoated with finish. Prior to application of finish, the surface must be treated with the Prep System using screen P150 to remove build up from previous applications of Freshen Up. Complement the screen by going in afterwards with the Bona Scrad System P220 to smooth out scratches. For more overcoating instructions see the product data for Bona waterborne finishes and Bona Prep at www.bona.com.

Precautions

Applying Freshen Up to a satin or low gloss surface will increase the gloss level. Freshen Up is for use on finished wooden floors only. Do not use over any floor that has been waxed or oiled. Wax and oil residues will prevent the proper adhesion of Freshen Up to the floor.

Always test floors for appearance and adhesion in an inconspicuous area before use.

**Use
together
with:**

- Bona Care Mop
- Bona Care Applicator Pad
